

Weekly Report

Lu Junhua

2015 年 11 月 1 日

This week I collected papers for netease and the literature review.

In the literature research,

- Ma Yunxin discussed the framework with me. And provided many papers for me.
- I wrote a brief summary with blend of Chinese and English.
- Still, many papers remain unread, and I will read them one by one in the rest of time. And I think I should lift my ability in reading papers.

In netease,

- Choose which framework to use as our system front & backend. backbone.js and MySQL/MongoDB is preferred. However, I will learn more about MongoDB to decide which one to apply.
- Select papers for related work,
- Think about analysis tasks, raise several questions.

Several notes after talking to QNYH players:

- 时装好看, 有些还能加属性, 就是贵了点. 问了四个人都没买过
- 银两元宝互换是在一个平台上发生的, 他们之间汇率不太稳定, 也会有通货膨胀这种事情的. 这个兑换过程并没有诸如聊天的强制附加要求
- 银票元宝票啊也是做任务等等可以弄到的, 不过都是绑定的, 不能交易, 买到的东西也不能卖
- 加入帮会才有修为. 帮会的组建并不一定要钱. 加帮会首先自己要满足一些条件比如等级, 加了帮会以后提升修为的方式是: 加这些属性是以技能的形式加的, 比如加血量上限的叫五禽戏, 每提升一个等级需要一定的银两, 经验, 以及帮会贡献, 技能等级越高需求也越高. 帮会贡献是完成帮会各种任务的时候可以得到.

Next week, I will better all the work have been done this week.
